

# CCR

## Quality policy

CCR is a world-class provider of high-quality sustainable temperature solutions. Our vision is to create solutions that matter for people and our planet. We are committed to providing our customers with an exceptional lifecycle experience with our products and services by delivering compliant products, on time, that meet or exceeds all requirements and expectations.

Leadership ensures legal compliance and an effective quality management system, strictly set quality objectives, continuous improvement in alignment with the context and strategic direction of the company and minimizes risks that satisfy all interested parties. We comply with PED, SELO and UL, as well as the ISO quality system.

Employees are trained and developed to embrace the Quality Policy by promoting teamwork to continually improve and drive excellence in our business processes with our quality management system. This is accomplished through a zero-defect mindset, innovative quality designs, lean manufacturing processes, a strong supply base and responsive post-sales support.

A handwritten signature in blue ink, appearing to read 'M. Eisenhuth'.
